Monthly Factsheet - 31/05/2024

INVESTMENT OBJECTIVE

Carmignac Portfolio Merger Arbitrage is a UCITS fund, following an alternative investment strategy that seeks to benefit from the price discontinuities ("arbitrage") of the shares related to merger and acquisition transactions. The Fund invests in officially announced M&A deals in the developed markets. The Fund seeks to outperform its reference indicator over a 3-year investment horizon through capital growth.

Fund Management analysis can be found on P.3

FUND MANAGEMENT ANALYSIS

MARKET ENVIRONMENT

- May was a difficult month for the strategy, with the HFRX Merger Arbitrage index down 0.8%.
- This was partly due to the increase in the DS Smith spread amid rumours of an offer for its potential buyer, International Paper, from Brazil's Suzano.
- Other spreads also rose in May, though without anything specific to point out: Hess, Ansys and Cerevel Therapeutics
- A few major deals were completed: Pioneer Natural Resources, SP Plus and MorphoSys
- It seems the resources freed up are being reallocated to some recently announced smaller deals, on which spreads are fairly small.
- M&A activity is holding up well with 30 new deals announced in May for a total of \$114bn. Most of this growth is coming from Europe and Asia.
- Private Equity funds account for nearly half of all bidders in deals announced during the month.

PERFORMANCE COMMENTARY

- The Fund delivered a positive return.
- The main contributors were: Pioneer Natural Resources, SP Plus and MorphoSys
- The main hindrances were: Hess, Ansys and Cerevel Therapeutics
- We had no position on the DS Smith spread when rumours emerged about an offer for its potential buyer. Shortly after, though, we opened a small position when the risk-reward profile looked interesting.

OUTLOOK AND INVESTMENT STRATEGY

- The Fund's investment rate is currently close to 26% given the large number of deals closed in May.
- With 42 positions in the portfolio, diversification remains satisfactory.
- 2024 should see the M&A cycle pick up due to the stabilisation (or even reduction) in interest rates, the energy transition spreading to more sectors of the economy, private equity funds making a return, and Japanese stock markets undergoing regulatory change.
- The risk premium on the Merger Arbitrage strategy still offers investors some attractive returns, especially at a time when few deals are collapsing.

GLOSSARY

Active Management: An investment management approach where a manager aims to beat the market through research, analysis and their own judgement. See also Passive management.

ESG score Calculation: Only the Equity and Corporate Bond holdings of the fund considered. Overall Fund Rating calculated using MSCI Fund ESG Quality Score methodology: excluding cash and non ESG-rated holdings, performing a weighted average of the normalized weights of the holdings and the Industry-Adjusted Score of the holdings, multiplied by (1+Adjustment%) which consists of the weight of positively trending ESG ratings minus the weight of ESG laggards minus the weight of negatively trending ESG ratings. For a detailed explanation see "MSCI ESG Fund Ratings Methodology", Section 2.3. Updated June 2021. <https://www.msci.com/documents/1296102/15388113/MSCI+ESG+Fund+Ratings+Exec+Summary+Methodology.pdf/ec622acc-42a7-158f-6a47-ed7aa4503d4f?t=1562690846881>.

Investment/net exposure rate: The investment rate constitutes the volume of assets invested expressed as a percentage of the portfolio. Adding the impact of the derivatives to this investment rate results in the net exposure rate, which corresponds to the real percentage of asset exposure to a certain risk. Derivatives can be used to increase the underlying asset's exposure (stimulation) or reduce it (hedging).

Merger Arbitrage Risk: The risk level of each deal from the equity long book of the portfolio is assessed to determine the risk of deal failure. Ratings are based on our in-house methodology and rated between A and C, where A is the least risky and C is the highest risk.

Merger Arbitrage Type/Nature: Each invested security is analysed to determine whether the deal from the buyer is strategic or financial and if the deal is hostile or friendly.

Net asset value: Price of all units (in an FCP) or shares (in a SICAV).

SICAV: Société d'Investissement à Capital Variable (Open-ended investment company with variable capital)

ESG DEFINITIONS & METHODOLOGY

ESG: E for Environment, S for Social, G for Governance

Principal Adverse Impacts (PAI): Negative, material, or potentially material effects on sustainability factors that result from, worsen, or are directly related to investment choices or advice performed by a legal entity. Examples include GHG emissions and carbon footprint.

Sustainable Investments: The SFDR defines sustainable investment as an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Taxonomy Alignment: In the context of an individual company, taxonomy alignment is defined as the proportion of a company's revenue that comes from activities that meet certain environmental criteria. In the context of an individual fund or portfolio, alignment is defined as the portfolio-weight weighted average taxonomy alignment of included companies. For more information, please follow this link: https://ec.europa.eu/info/sites/default/files/business_economy_euro/banking_and_finance/documents/sustainable-finance-taxonomy-faq_en.pdf

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

(6) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: www.carmignac.com.

MAIN RISKS OF THE FUND

EQUITY: The Fund may be affected by stock price variations, the scale of which is dependent on external factors, stock trading volumes or market capitalization.

ARBITRAGE RISK: Arbitrage seeks to benefit from such price differences (e.g. in markets, sectors, securities, currencies). If arbitrage performs unfavorably, an investment may lose its value and generate a loss for the Sub-Fund. **RISK ASSOCIATED WITH THE LONG/SHORT STRATEGY:** This risk is linked to long and/or short positions designed to adjust net market exposure. The fund may suffer high losses if its long and short positions undergo simultaneous unfavourable development in opposite directions. **LIQUIDITY:** Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions.

The Fund presents a risk of loss of capital.
